Professional Profile

I am passionate and driven in the web industry and see it as a modern artform. I have sought out and ascertained work in a central London web design company mid-way through my degree and this has given me a valuable foundation for career progression.

I am adaptable to change and flexible in my work ethic and am able meet deadlines under pressure. I have a great zeal to further my knowledge and abilities and have demonstrate this by furthering my technical knowledge of web design outside of academia.

Education

2 : 1 BSc (Hons) Business Information Technology

A-levels

Information Technology **D**

Business Studies **C**

Accounting **D**

GCSE's

Maths **A**

Further Maths **B**

English **B**

Physics **B**

Experience

The Web Kitchen (TWK)

July – August 2019

I reached out to TWK for voluntary work in the summer to gain an understanding of the industry and better my skills in web design.

I played roles in migrating content and being part of new modernised sites for companies. I took part in meetings to understand how the industry operates and how projects are managed.

I was part of site testing and completing tasks set by clients to maintain existing sites. This allowed me to understand how the industry functions with existing clients and the how the communication line operates.

Haarts Estate Agents (July – August 2016)

I was offered work experience through my sixth form to work for two weeks in the summer. I played a role as a personal assistant. I printed contracts, franked letters, reorganised hundreds of files in cabinets alphabetically and confirmed documents for clients.

Once my two weeks finished I was asked to stay for longer as I was the only student to complete tasks correctly and learn their systems quickly and for being thorough in every task completed. I was even offered to be trained and employed by them however I chose to further my education.

Skills Gained:

Commitment / Dedication to tasks in a work environment

Being Adaptable

Working as a Team in the industry

Effective Team Communication

Using WordPress

Updating webpages for clients

Migrating content from old to new site / Site Testing

The importance of client needs
